English Hills, Ginza  
Tokyo, Japan

## **Spirituality and Rationality**

The instructor, Toshiyuki Namai is devoutly lecturing upon so many themes in various fields of sciences, cultures and arts all over the world in the lessons here at English Hills, Ginza which is the very extraordinary academy (institution) in comparison with other educational institutions in the world.

I Toshiyuki Namai clearly tell you that the lessons are conducted in order to intellectually and rationally teach various matters based upon interdisciplinary teaching method highly organized.

Frankly speaking, these various matters I teach in the lessons are derived from the same cerebral nucleus, that is to say, the concrete themes (or topics) in each of matters are spoken from my intellectuality and rationality for the sake of the realization of fruitful instruction for you all.

As for me, this language, namely “English” is not just a language for communication itself. The existence of English language is the very embodiment of my “spirituality” and “rationality” for me.

It is obviously true that what I speak comes from the core of my individuality as one of rational existents standing upon the earth in the solar system in the universe. This is “not” a matter of armchair theory. This is the very reality of reality no one can deny at all.

In addition to it, I without hesitation risk my individuality at all times to educationally express any matters in the lessons to be recorded by the students who seriously review all I deliberately speak deriving from my intellectuality and rationality for building their valuable culture by inches. Therefore, it is very essential for the students all to recognize and understand the meaning and value of the words carefully spoken by me in the lessons.

Now, I really need to tell you that it is surely up to you all, whether you understand the value and profundity of what I lecture upon or not in the lessons. I constructively acquaint you with the following once again, all I lecture upon in my teaching derives from “spirituality” and “rationality” I possess in my individuality.

As it is recognized that I don’t teach you any local (or nonsensical) matters. Or, even though I speak a local matter out of necessity, some essential elements deriving from my intellectuality and rationality are intentionally included in the topic spoken. This means all hydra-headed matters you study in the lessons are very important for building the two, your future intellectuality and rationality as well. Whether you understand this or not hinges upon your insight absolutely.

What I speak in front of you is the embodiment of my intellectuality and rationality. I’d like you all to valorously face these ones in all lessons given.

Truthfully for your sake, I’d like you to gracefully ignite your heart and study a deluge of essential matters out of the three major fields, sciences, cultures and arts in the world to your heart’s content. This is absolutely my hope I have in my heart as your instructor here at English Hills, Ginza, Tokyo, Japan.

I Toshiyuki Namai pointedly assert that “knowledge itself is powerless.” Knowledge is a tool to use. The most important thing for you all to realize your cultured bilingualism is the development of intellectuality and rationality.

I'd like you to freshly wake up now. Have you ever noticed the following reality? You all the students already started going forth in the intellectual and rational voyage under the aegis of holy instruction of mine at English Hills, Ginza. I hope that "you go through the eye of a needle" in this essential voyage.

The aforementioned voyage is "piece de resistance" given in the lessons you are expected to taste lusciously. You really need to be delicate enough to taste it in the lessons given.

You have the totally different quality of the future with or without grasping it. You are surely expected to do it for your sake now and in the future.
