Socrates guides you to know your ignorance

Toshiyuki Namai

Socrates guides you to know your ignorance

Are you proud of your knowledge?

Do you consider that you know a lot of things?

Tranquilize your heart

Speculate about what you know

Your heart knows something real

The reality your heart knows is what you know is just a trifle

If you are unwise,

You consider that you know a lot of things yourself

If you are wise,

You certainly doubt what you know now

Socrates tells you an essential message

Imagine,

If you consider that you know a lot of things,

It means you don't know anything essential at all

Wake up now,

Recognize how you don't know anything

To know your ignorance is the very first step to reach wisdom

Wisdom is silent

You need to be an active existent to reach it
